Looky FEATURES

Folding Handle

The Looky is equipped with a convenient folding handle that allows the user to place the Looky directly on the page or object. Folded up, it easily fits in your pocket or the handy carrying case. With the handle extended, the Looky works as a magnifier. The closer you are to an object, the larger the magnification will be (from 3x to 8x).

Reading With Handle Folded Under

Sharp, Clear Image

The 3.5" LCD screen displays a Clear Image in 3 different modes: Full Color, Black on White, and White on Black (Reversed). Long lasting LED lights provide illumination for best image.

Freeze Function

By pressing the Yellow button once, you can freeze the image on the Looky's display. This handy feature can be used to steady the image. For example, while viewing a pill bottle, the magnified image can be captured in the screen to allow user to record the information. The normal magnifier function is restored by pressing the yellow button again.

Writing Support Stand

The Looky can also be used for writing. For additional stability, the Support Stand can be inserted in the handle to allow various height and viewing angles while writing or reading.

.

Writing With The Looky

Rechargeable Batteries

Two AA rechargeable batteries and a charger come with every new Looky. Once charged, you can use the Looky 1.5 to 2 hours on average. Easily plugs in for charging. See User Manual for more information.

Handy Carrying Case

Attractive Carrying case and strap can be attached to your belt, slung around your shoulder, or conveniently stored.

Quality & Warranty

The Looky is manufactured by Rehan Electronics and undergoes rigorous quality testing before being shipped. Each Unit is protected by a 2 Year Manufacturers Warranty.
